Y2000	325	£30.00	£9750.00	£2000.00	£7750.00

Step plans are included between plans listed above to help the reseller continue to earn a profit when upgrading. These plans are called S1, S2, S3 and so on. If the reseller has plan Y100 with 10 clients then brought on a new client giving them 11, they would have to upgrade to Y200. Well instead of losing potential profit from the Y100 package we add what's called a step plan onto your existing plan costing £30 extra a month. In this case the reseller would be using plan Y100S1 costing £130 a month for 11 accounts. This freezes the resellers profit so that they do not lose money from upgrading, but once they reach 14 accounts Y100S4 (costing £210 p/m) they automatically start using the Y200 package at £200 instead. This then gives the reseller the potential and scope to earn more profit from every new customer then on. In basic terms, we want to help the reseller progress not stump their growth.

All modules are included with every system so you can sell each module individually per client or you can include everything for a set price.

*£30 is our suggested monthly fee that you should charge your customer. Each new account set up on your reseller package is subject to a £100 setup fee, this covers the cost of web space, domain charges, template implementation to the system and account installation. The monthly fee you then pay us covers the cost of the domain and hosting charges forever as long as your contract is renewed on a yearly bases at least one month before it expires. Please see full terms and conditions.
